

PAC FINAL ASSIGNMENT

"Environmental and Water Issues Around the World"

For completion of the course you will be expected to complete two assignments. The assignments are due on Friday, December 19, 2008. Please send to Nancy Heingartner, by email: <outreach@creeca.wisc.edu>.

Assignment 1: Reflection Paper

- 1) Please write a one-page reflection on the entire course. Please reflect on what you feel you learned most about; if any of your pre-existing ideas changed through the discussions, and how; and if and of the topics covered prompted discussions in your classrooms or with fellow educators.

Assignment 2: Choose one of two options

- 2) Option 1: Please write a two-three page action plan on how a topic covered in the PAC class can be adapted for classroom use. Please include a description of the project (one-page); where it will fit into your existing teaching curricula – or will you be initiating something new to fit this topic; resources needed (or to be used); student project work; and any collaboration with other subjects or resource people in your school (i.e., creative writing class, library/librarian, reading specialist, social worker, etc.)
- 3) Option 2: Consider one of the lectures during the course, or choose another region in the world that is experiencing an environmental or water crisis. Find at least four sources, two of which are **not** from U.S. media. Write a two-three page reflection paper on the situation in this region, and cite your sources.
